ABOUT ME

I have worked on ERP and HR automation projects, gaining experience in both technical and business process management. I am motivated to keep improving my skills through creative projects. I am looking for a role where I can continue to grow and learn from experienced team members.

EXPERIENCE

Junior Developer　　　　Bilin Software and IT Consultancy Inc.　　　Oct 2023 - Sept 2024

- I worked on global HR management approaches with the newest technologies, using a unique structure for Enterprise clients with expert knowledge and proven methods. I created the reports requested by clients using Microsoft Report Builder and SQL, following analysis and functional design documents. I also worked as a developer with the team in product development processes for Standard and Enterprise clients.
- I developed the reports requested by the client using Microsoft Report Builder and SQL, following the analysis and functional design documents.
- I worked as a developer with the team in the standard product development processes for Enterprise clients.
